

Purpose of grant:	Purchase of lacrosse equipment to facilitate expanded Quick Stix development into SE Queensland
Outcome of support:	Equipment available for several more programs. Reached 1500 more kids
Statistics:	March - August 2022 reached 1038 participants in non-QS programs September 2022 - March 2023 reached 610 participants in non-QS programs

Summary paragraph

Equipment purchased with this grant has allowed us to start new programs at multiple new schools in the Brisbane area which was not possible before due to a lack of equipment (especially equipment more suitable to primary school children).

In 2021 we conducted less than 10 distinct programs, in 2022 we have conducted programs with 12 school (plus programs conducted by our contractor).

Events such as the Mountain Live program which was one of the largest single development programs run in Queensland with over 200 participants.

It would not have been possible without the equipment supplied through this grant. This equipment has dramatically improved our capability to deliver simultaneous programs at multiple locations in the Brisbane region.

The equipment supplied through this grant is integral to Lacrosse Queensland adjusted focus on schools and junior development. Our plan is to incrementally increase our capacity to deliver programs each year until we are able to deliver programs to 120 Schools per year. We are hoping to reach this target by 2027
